Professional Summary

Computer Science graduate with hands-on experience in data analysis, performance monitoring, and KPI reporting. Skilled in validating large datasets, ensuring data accuracy, and identifying process gaps and operational delays. Proficient in Power BI, SQL, and Excel to support reporting, dashboard development, and data-driven decision-making. Detail-oriented with a strong focus on efficiency, quality, and continuous process improvement.

Education

Bachelor of Science in Computer Science
Taibah University

2020 – 2025
Madina

Skills

Technical Skills

- Power BI (Dashboards, KPI Tracking, Performance Reporting)
- SQL (Queries, Views, Data Validation)
- Excel (Reporting, Tracking Sheets, Data Analysis)
- Databases: SQLite, MySQL
- Python (Data Analysis & Monitoring)
- Data Accuracy & Quality Control
- Performance Monitoring & Reporting

Soft Skills

- Analytical & Critical Thinking
- Strong Attention to Detail
- Problem Solving
- Time Management & Prioritization
- Clear Reporting & Documentation
- Cross-Team Communication
- Adaptability in Fast-Paced Environments

Professional Experience

Graduation Project – “Seelm” (Arabic Hate Speech Detection)

2025

- Cleaned and reclassified 25,000+ Arabic tweets, ensuring data accuracy, quality control, and compliance with project standards.
- Trained and compared multiple NLP models, analyzing performance results to select the most effective model based on accuracy and risk indicators.
- Developed a smart keyboard that provides real-time alerts for hate speech, supporting risk detection, preventive controls, and user protection.

Steam Games Data Analysis & Dashboard

09/2025

- Cleaned and analyzed 8,843 records, ensuring data integrity and reporting accuracy.
- Built Power BI dashboards to track performance metrics, KPIs, and trends, supporting business analysis and performance monitoring.

Real Estate Rental Prices Analysis & Dashboard

07/2025

- Designed and implemented a Power BI dashboard to analyze and present rental price insights.
- Used SQLite as a centralized database with SQL Views for structured data preparation and reporting.
- Connected the database to Power BI via ODBC, following best practices in data modeling and data accuracy.

Certificates

- Foundational Program in Artificial Intelligence King Saud University – Center for Advanced Studies in Artificial Intelligence (Thakaa)
- Machine Learning Bootcamp Saudi Data and AI Authority (SDAIA)
- Data Analytics Learning Pathway – Level 1 & Level 2 Saudi Digital Academy (FutureX) in collaboration with Coursera

Languages

- Arabic - Native
- English - Intermediate
